MY&HU
HANEDAN TEKNOLOJİ

Your company's AI team. Under your control.

A team that reads your documents, keeps your records orderly, analyses your sales and warns you at the right time.

The demo runs on sample (fictional) data. Real AI: your own API key.

Document Agent

Reads invoices and documents and extracts fields; documents are never deleted.

Finance and VAT

Currencies kept apart; a wrong entry is voided with a reason, never deleted.

Sales and forecasting

Customer segments, churn risk and revenue forecast using real machine learning.

A system that learns

Rules and corrections you teach are used by every agent in later answers.

Compliance checks

Structural checks focused on TTK, VUK and KVKK. Not legal advice.

Annual license

Signals at 30 and 7 days; locks when it ends; a new key reopens it at once.

MY&HU
HANEDAN TEKNOLOJİ

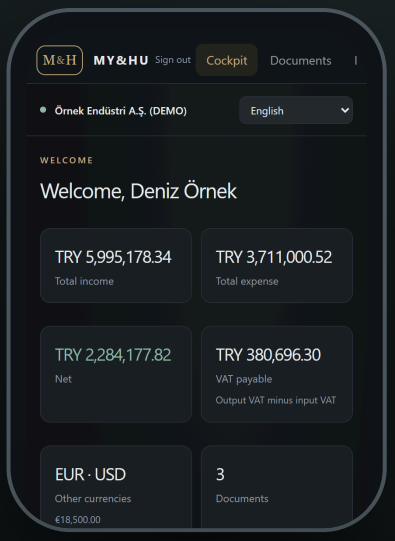

How it works

1 Install
A Windows installer, ready in minutes; no Python needed.

2 Introduce
Enter your company details and your own AI key.

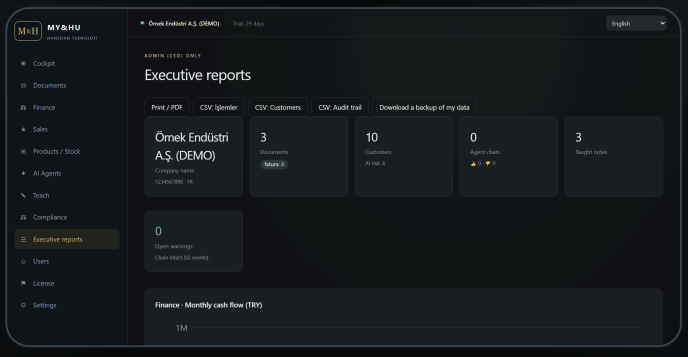

3 Teach
Write your rules and corrections; agents get to know your company.

4 Manage
The admin sees every report; the team works in their own screens.

5 users, clear permissions

The admin (CEO) sees every module and report. Finance, Sales, Procurement and Operations roles see only their own area.

Designed for orderly, lawful record-keeping

- Records are never deleted; they are voided with a reason (TTK art. 82: 10-year retention).
- Hash-chained audit trail: after-the-fact changes are detected.
- VAT-inclusive amounts, invoice and tax ID checks (VKN/TCKN validation).
- KVKK reminders and an AI data-transfer warning.

This software is not legal, financial or tax advice. Confirm results with your accountant.

Good to know

- GİB e-Invoice/e-Ledger, bank and social-security integrations are not in this version.
- AI agents need your own Anthropic API key; provider fees are yours.
- For OCR install Tesseract, or let an API key read documents.
- Some long explanatory texts are still English; translations should be reviewed by native speakers.
